

Capabilities Career Communities

info@capabilitiesinc.biz • www.capabilitiesinc.biz • (419) 394-0003

Partnering with the Ohio Developmental Disabilities Council, Capabilities is connecting the dots to improve employment outcomes for people with developmental disabilities. Using a peer-to-peer mentoring approach, Career Communities builds leadership and connects small groups of people who inspire and motivate each other to succeed in their careers.

Career Communities are designed to provide key guidance and resources for people with disabilities and their direct support professionals. They are locally-focused, advocate-driven groups that use peer support on the journey toward and through community employment, including career development, career advancement, and career retention skills. Career Communities gives advocates the tools and education needed to increase independence.

Providers who participate will positively benefit from having experts in the field who understand the trials and successes of supporting people with disabilities on their employment journeys. Participants of Career Communities will have a network of other people with developmental disabilities who are focusing on their careers. The participants will have peer groups that are naturally inspired to succeed in their own career environments.

What We'll Cover

- Are You Ready For a Job?
- What Do I Want to Do?
- Getting Ready for Work
- Job Seeking Training
- You Got the Job! Now What?
- On-the-Job Needs
