

Perhaps you have heard by now about ProviderGuidePlus --- an exciting new resource for rating providers of services for people with developmental disabilities in Ohio.

ProviderGuidePlus is a provider information and selection tool for individuals and their loved ones. This easy-to-use, online system provides an opportunity for individuals and families to rate their provider and learn how others have rated their providers.

ProviderGuidePlus has operated as a pilot in three counties for the past year and a half, and is now ready to launch in the rest of the state during the coming months.

**You are invited to hear about ProviderGuidePlus,
see a demonstration, and ask questions.**

The website developer will be at this event to explain how ProviderGuidePlus works and to answer your questions.

Your influence in the DD community will be instrumental in helping to spread the message about ProviderGuidePlus to the many families who have been asking for a resource like this.
