

Waiver Workgroup Meeting – 07/25/2019

5123-9-30 - On-Site/On-Call

Proposed rule language changes – For Discussion

(B) Definitions

(19) "On-site/on-call" means a rate paid when no need for supervision or supports is anticipated **for a minimum continuous period of no less than five hours**, and a provider must be on-site and available to provide homemaker/personal care **if an unanticipated need arises** but is not required to remain awake.

(F) Payment standards

(11) The team shall assess, **utilizing the assessment tool included in appendix C of this rule**, and document in the individual service plan when on-site/on-call may be appropriate.

(c)A provider shall be paid the routine homemaker/personal care rate instead of the on-site/on-call rate when:

(i) **An individual's needs do not allow for an uninterrupted period of at least five consecutive hours with no supervision or support.**

(ii) **An individual's needs allow for an uninterrupted period of at least five consecutive hours with no supervision or support, but the individual receives supervision or supports at another period** during the night. In these instances, the provider shall document the date and beginning and ending times during which supervision or supports were provided to the individual.
