New OPRA Team Member Announcement

We are excited to announce that Scott Marks, MSW, will be joining the OPRA team on September 3rd, 2019 as OPRA's Director of Operations. In this role, he will work with the OPRA team to expand the innovative services and supports that OPRA provides to its Membership. Scott will help coordinate OPRA communications, special projects/partnerships, development of non-dues revenue and Member training initiatives.

Throughout his career, Scott has gone from working as a direct support professional to managing multimillion-dollar statewide grant projects. He has experience on a broad array of human services and disability supports that range from children's services, community employment services, Medicaid waiver administration and individual service planning. In his previous role as the Community Opportunities Director for the Ohio Association of County Boards, Scott had developed, coordinated and implemented training products on supported decision-making, person-centered thinking and planning, asset-based community development, trauma-informed care and customized employment to help providers and county boards strategically plan for the future of service delivery. Scott has also been instrumental in many system transformation initiatives including leading the most recent revision of the Non-Medical and HPC Transportation service.

We believe Scott's knowledge, experience and energy will have an immediate and positive impact on OPRA, our Members, and the individuals you support.

Welcome Scott to the OPRA family!
