microSURE™ - BETTER PROTECTION AGAINST CORONAVIRUS

"These structures will disrupt the microbial organism, thus killing the cell and rendering it harmless."

*-Dr. Erwin Lo
Neurosurgeon and Founder*

microSURE™ persistent nano-technology germ killing products go to war on >99.99% of harmful microorganisms [or pathogens] that make you sick or potentially cause disease. When microSURE™ is applied, a barrier of crystal killing spikes bonds to hands and surfaces creating a long lasting antimicrobial barrier that stays working and locked in place long after it is applied. This covalent bond becomes a barrier on the surface on which it is attached.

As germs come into contact with surfaces they are punctured by the killing spikes on contact and die. This results in a mechanical kill - allowing the surface of an object to destroy the cell walls. This is different than a chemical kill which uses toxic combinations of chemicals (alcohol, bleaches, acids) against biological threats such as bacteria and viruses that provide no long lasting protection.

Surface Disinfectant

Crystal Clean Laundry Additive

SmartHands™ - SANITIZER DISPENSER

The SmartHands™ automatic sanitizer dispenser is equipped with state-of-the-art infrared sensors which dispenses the microSURE™ 8-Hour Defense™ hand sanitizer. The large capacity disposable bag will provide up to 1,250 uses providing protection for up to 8 hours. The stylish design is perfect for use in many locations such as:

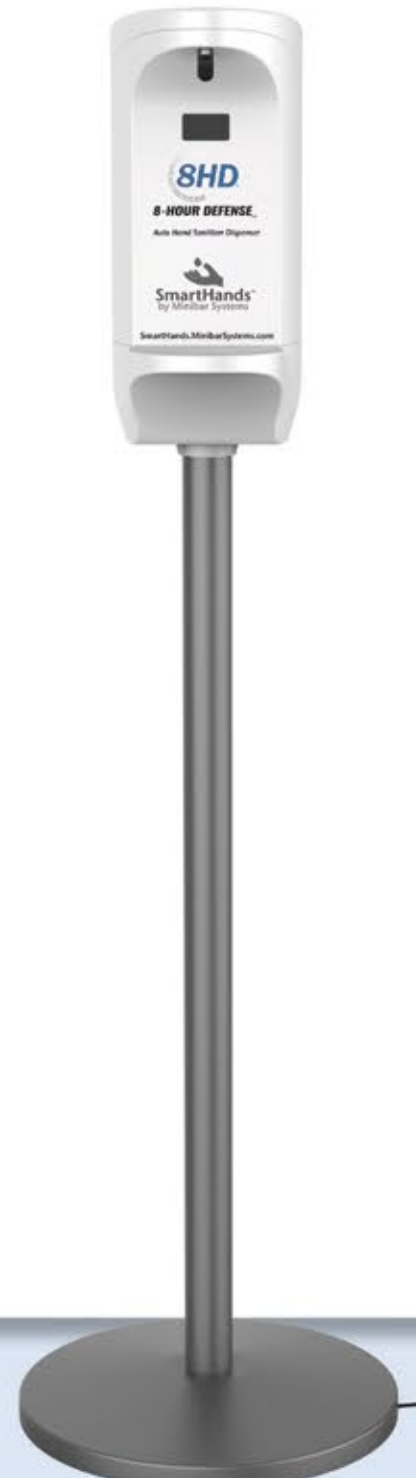

- Hotels
- Offices
- Theatres
- Public Transportation
- Residences
- Restaurants
- Health Clubs
- Cruise Ships
- Convention Centers
- Public Spaces
- Senior Living Centers
- Schools
- Airlines
- Retail Malls & Stores
- Day care centers

SmartHands™ - FEATURES AND SPECIFICATIONS

FEATURES

Eliminates cross-contamination

State-of-the-art infrared technology

Lockable cover design

Percentage of remaining sanitizer

Low battery light indicator

Drip tray

Disposable bag

1,250 uses per bag / 7,500 uses per case

SPECIFICATIONS

Color: White

Material: ABS Plastic

Capacity: 1000 ml disposable bag (33.8 oz.)

Power: 4 x AA Batteries or AC Power (included)

Sensor Range: Up to 4 inches

Weight:

Wall Mount: 3.75 lbs / 1.75 kgs

Table Stand: 3.53 lbs / 1.6 kgs

Floor Stand: 14.33 lbs / 6.5 kgs

Dimensions:

Wall Mount (in): 10.8H X 5.9W X 4.7D

(mm): 275H X 150W X 120D

Table Stand (in): 10.8H X 5.9W X 4.7D

(mm): 275H X 150W X 120D

Floor Stand (in): 45.5H X 12.6W X 12.6D

(mm): 1156H X 320W X 320D

microSURE™ - 8-HOUR DEFENSE™

FDA NDC 72513-100

microSURE™ 8-Hour Defense™ kills germs on contact and leaves an invisible “breathable” barrier that stays working and locked in place for 8 hours or more*. Experience heightened protection before and after exposure. microSURE™ 8-Hour Defense™ hand sanitizer was specifically developed to help eradicate germs, pathogens and harmful microorganisms to come. Never sacrifice safety for product performance again.

- Up to 99.99% effective against most germs
- Alcohol free – No harsh chemicals & fumes
- Gentle on people and pets
- No skin cracking, drying or burning
- FDA registered and available OTC
- Nano technology creating crystalline structures
- Doesn't wash off
- 5 year shelf life

** skin cells may be shed prior to 8 hours naturally or by abrasion. reapply as needed.*

microSURE™ - DISINFECTANT

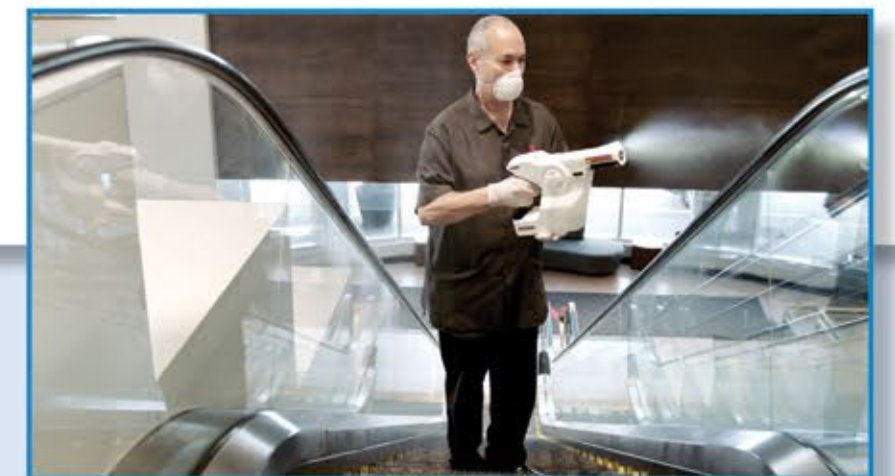

EPA EST. NO. 10508-TN-001

microSURE™ All Purpose Cleaner and Disinfectant is a one-step Ready-to-Use (RTU) disinfectant cleaner and odor neutralizer designed for general cleaning and disinfecting of hard, non-porous, inanimate surfaces. microSURE™ kills 99.99% of common germs when applied including: virucidal, bacterial, fungicidal microbials and viruses including Coronavirus. Its proprietary formula creates a micro crystalline structure forming a covalent bond to almost any surface and **is effective not only at application but continues killing harmful pathogens for weeks and months longer than typical disinfectants.**

- Used in hospital operating rooms
- 99.99% effective against most germs
- Multipurpose - replaces all other cleaners
- Can be used indoor or outdoor
- 5 year shelf life
- Approved EPA Device

Invisible barrier protects surfaces all day

Protects public areas

microSURE™ - CRYSTAL CLEAN LAUNDRY ADDITIVE

EPA #1839-83

Coming Soon

microSURE™ Crystal Clean Laundry Additive attaches to nearly every fiber during the wash cycle and begins to kill after the fabric fibers are dry and continues to mechanically kill germs as the fabric is touched or worn. microSURE™ laundry detergent forms a strong covalent bond with fabric after drying that begins killing action and that can last up to 75 washes.

- Rewashing reinforces the killing barrier
- Made in USA
- 5 year shelf life

Attaches during wash cycle

Protects textiles up to 75 washes

microSURE™ - THE COMPANIES

Minibar Systems Worldwide is the leading global company that has provided excellent service to the hospitality industry for over 50 years with our Minibars, Fridges and Safes for hotel guestrooms. We are also involved in the medical industry as the manufacturer of the MinibarRx automated vaccine dispensing machine (minibarrx.com) with our partner **FFF Enterprises** (fffenterprises.com), one of the nation's leading suppliers of critical-care biopharmaceuticals and vaccines. Minibar Systems is pleased to be the exclusive distributor of microSURE™ product solutions to the hospitality and travel industries and other markets.

Strategia and **Servismed** are companies with a group of diverse medical industry professionals focused on bringing to market groundbreaking technologies to better protect us from harmful and hazardous microorganisms. Their mission is to become the most trusted provider of better protection products with superior functionality and value for all customers across the globe and the communities in which we live and work.
