

Have you or someone you have cared for experienced a coma, unconsciousness or minimally conscious state?

If **YES**, complete this survey to help us learn more about the needs of Ohioans impacted by brain injury

WHY?

The Ohio Brain Injury Program is looking to identify the unique needs of those who have experienced brain injury resulting in coma, unconsciousness state or minimally conscious state.

Information will be used to inform and recommend policies and to improve services for Ohioans with brain injury and their families.

HOW?

- A brief online survey
- If you choose to, a follow-up interview about the injury and the care you received
- **All information will be kept confidential**
