Therap ® SERVICES

for States & Counties

System Features

Web-Based, Software as a Service
Allows for accessibility and portability of records. Flexible hardware requirements - works with most devices that support a web browser.

Seamless Integration with Provider Systems
Users have access to the oversight agency system and provider records from within the same interface. An Individual's records at the state system and in the provider accounts can be easily linked. Oversight users can also access incident reports, communications logs (T-Logs) and secure messages from provider agencies from their FirstPage. The Referral process is handled completely within Therap

Multilevel-Access Privilege
With Therap's multi-level access mechanism, government administrators, provider staff and family members of individuals can securely and effectively share information from the same source.

Electronic Signatures and Audit Trails
Actions performed on Therap electronic forms and records bear the electronic signature of the user. Audit trails can be tracked by administrators for all electronic documents with just a few clicks.

Comprehensive Reports
Comprehensive reporting features are available for all modules and forms.

Alerts and Notifications
Automatic alerts can be sent to users via email or text messaging as records are created and updated.

Secure Communications
Encrypted messages & documents can be shared between oversight agency users (e.g., case managers or administrators) and provider account users. Communication within providers is now simple and HIPAA compliant.

National, Regional, and State Conferences

Basic & Advanced Training

Interactions
Between Users & Therap

Brainstorming
on Future Developments

Throughout the year Therap hosts a number of conferences across the US to interact with prospective and existing users. For more information on Therap conferences please visit
